

# How to Develop as a Leader in the Realm of Team Science

- Intro – have everyone state their name, affiliation, and position
- Find someone to take notes
- Questions for discussion:
  - What does it mean to be a leader, especially in this newer era of team science (where for instance, not everyone is the PI of an R01)?
  - What can we do, as statisticians/epidemiologists (i.e. primarily collaborative folks), to demonstrate leadership in different teams?
  - How can we demonstrate leadership in such teams to use for promotion & tenure committees?
