

ACTStat

Association of Clinical and Translational Statisticians

Dear Colleagues –

I would like to announce a **call for posters and for applications for the Early Career Award** for the 2019 Association of Clinical and Translational Statisticians (ACTStat) Annual Meeting. The purpose of the Early Career Award is to recognize the meritorious works and achievements of an early career individual among us that has provided substantial support to team clinical or translational science through the practice of statistics. Those within seven years of their terminal degree are eligible to apply for the Early Career Award, and this award is not limited to faculty (e.g., those in industry, government, etc., are also eligible). The Early Career Award winner will be invited to present their work as a talk at the annual meeting and will receive a \$250 honorarium.

Demonstrate what you have done that has contributed to team science!

- *To be considered for a poster presentation*, please submit an abstract of your presentation.
- *For those submitting for the Early Career Award*, in addition to an abstract please also include a statement of how your work has made an impact in supporting team and/or translational science, along with a resume, biosketch, or CV. (Past recipients of the Early Career Award are no longer eligible, but are encouraged to submit their new work for consideration as a poster presentation.)

To submit a poster for consideration and for the Early Career Award, email your materials to president_elect@actstat.org.

The meeting this year will be held in Denver, Colorado this year on July 27th and 28th just prior to the Joint Statistical Meetings. Poster presenters and the Early Career

Award winner will be selected by a committee assembled by the president elect of ACTStat.

The deadline for submission is Friday, May 3rd, 2019.

The 2019 ACTStat Annual Meeting provides an excellent opportunity to network with researchers interested in enhancing the design, implementation, and analysis of clinical and translational studies. Highlights of the 2019 ACTStat meeting will include:

- podium presentations from leading biostatisticians in clinical and translational science;
- vibrant discussions of topic areas relevant to providing comprehensive support for research through biostatistics cores;
- networking opportunities to connect with peers and mentors, including a networking dinner on Saturday, July 27th; and
- many other activities that serve to foster professional development.

More information about the 2019 ACTStat Annual Meeting is available at www.actstat.org.

Sincerely,

Jonathan D. Mahnken, Ph.D., PStat®
President Elect, Association of Clinical and Translational Statisticians (ACTStat)
