

ACTStat

Association of Clinical and Translational Statisticians

Dear Colleagues –

I would like to announce a **call for applications for the Early Career Award** for 2020 from the Association of Clinical and Translational Statisticians (ACTStat). The purpose of the Early Career Award is to recognize the meritorious works and achievements of an early career individual among us that has provided substantial support to team clinical or translational science through the practice of statistics. Those within seven years of their terminal degree are eligible to apply for the Early Career Award, and this award is not limited to faculty (e.g., those in industry, government, etc., are also eligible). The Early Career Award winner will be recognized and will also receive a \$250 honorarium.

Demonstrate what you have done that has contributed to team science!

- *To be considered for the Early Career Award*, please submit an abstract, a statement of how your work has made an impact in supporting team and/or translational science, along with a resume, biosketch, or CV. Due to the cancellation of the annual meeting in response to the ongoing pandemic, unfortunately there will not be an opportunity for a presentation by the winner this year. (Past recipients of the Early Career Award are no longer eligible.)

To submit an application for the Early Career Award please upload your materials to online at https://ucdenverdata.formstack.com/forms/actstat_applications_2020.

The deadline for submission is Friday, May 22nd, 2020.

The ACTStat organization provides opportunity for networking with researchers interested in enhancing the design, implementation, and analysis of clinical and translational studies. More information about ACTStat is available at www.actstat.org.

Sincerely,

A handwritten signature in black ink that reads "Nichole E. Carlson". The signature is written in a cursive style with a long horizontal flourish at the end.

Nichole E Carlson, PhD

President Elect, Association of Clinical and Translational Statisticians (ACTStat)
